

The Impact of Court-Supervised Modifications on Subprime Foreclosures ALASKA

Projected Foreclosure Impact in Alaska

| | |
|--|------------------|
| Foreclosures expected to occur (primarily 2008-2009) | 3,831 homes lost |
| Spillover impact: | |
| Surrounding homes suffering price declines caused by nearby foreclosures | 47,404 homes |
| Decrease in home values/tax base | \$190 million |
| Average decrease in home value per unit affected | \$4,013 |

Expected benefit of court-supervised modifications for Alaska families

| | |
|---------------------------------|-----------------------------|
| Reduced foreclosures | 958 fewer homes lost |
| Savings in home values/tax base | \$47.6 million saved |

Need to act now because the problem is worsening

State Subprime Foreclosure Starts (1Q2003- 3Q2007)

Note: Original CRL projections of subprime foreclosures and spillover impact updated to reflect newer estimates of subprime defaults as reported by Merrill Lynch (The Market Economist, December 14, 2007) and Moody's Economy.com (<http://judiciary.house.gov/media/pdfs/Zandi080129.pdf>). Additionally, foreclosure estimates calculated using outstanding subprime loans reported by the MBA in its 3Q 2007 National Delinquency Survey; latter is also the source for the subprime foreclosure starts. Spillover results do not include areas outside of metropolitan statistical areas. CRL reports on subprime foreclosures and spillover impact available at <http://www.responsiblelending.org/issues/mortgage/research/page.jsp?itemID=31217189> and <http://www.responsiblelending.org/issues/mortgage/research/subprime-spillover.html/>
